A Complete Door System

A Thermo-Tru® door with genuine Thermo-Tru parts is more than just a beautiful door. It's a complete door system – from the glass to the hinges – made to perform as good as it looks.

Standard Door Frame

Composite Door Frame

Frame Options

We can help you choose the right frame for your door system.

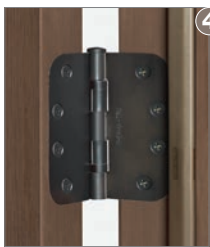

2 Removable Weatherstrip

Our resilient design compresses when closed and springs back when open. It's protected by a durable jacket for long-lasting sealing power.

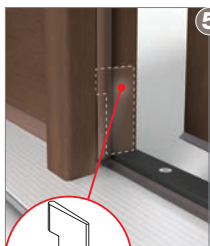

3 Hardware

Choose from beautiful options that will complement the look of your home and help bring you security and peace of mind.

4 Ball-Bearing Hinges

Hinges with ball-bearings protect each hinge pivot, offering added support and stability to help keep your door opening and closing smoothly.

5 7-Shape Corner Seal Pads

(Inswing Only) This innovative design creates a protective air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

6 Composite Adjustable Sills

These allow flexibility to adjust the sill cap vertically to close gaps, helping to maintain a tight seal between the sill and the bottom of the door.

Standard Mullion

Composite Mullion

Mullion Options

Mullions not only give the hinges and lock a place to anchor, they come in a range of sizes from 1"-3" in width per mullion to help create an entry door system to fit the opening of your home.

7 Dual-Bulb / Dual-Fin Bottom Sweep

(Inswing Only) Two bulbs compress to sit tight against the sill, while two fins act like walls to form barriers and a built-in rain deflector pushes moisture away.

PRISMA GUARD. Finished for Lasting Beauty

Handcrafted and professionally applied, a PrismaGuard finish is built to last, giving your customers confidence and peace of mind.

Durable
Topcoat

Professional
Application

PrismaGuard® Stain

Brings the authentic look of wood to life with rich tones that add dimension to enhance wood grain doors.

- 1 It starts with the realistic wood grains and deep embossments of a Therma-Tru® door or composite door frame.
- 2 A base coat provides an even, consistent color across the surface.
- 3 A wiping stain enhances the base coat while adding dimension to reflect the natural beauty of wood.
- 4 A durable topcoat enhances the high-definition color while protecting against scratches and color fading.
- 5 A second application of the topcoat provides added durability and optimal sheen for a high-end look.

PrismaGuard® Paint

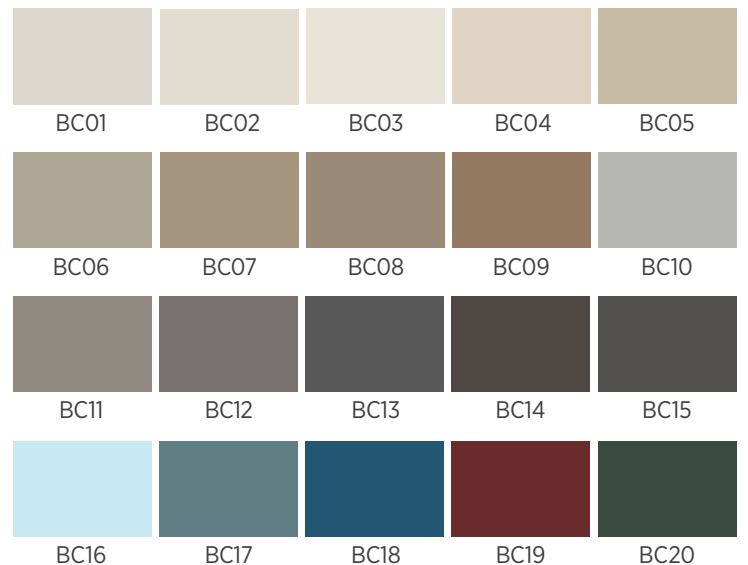

Delivers a pop of color, allowing you to tailor the look to make a beautiful lasting impression.

SYMPHONY COLLECTION™

Introducing the Symphony Collection by Boise Cascade

Enhance your home with this palette offering a ten year PrismaGuard warranty.

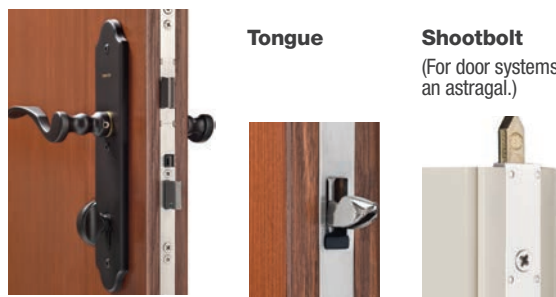

Multi-Point Locking Systems (MPLS)

Engages the door and frame at three critical points from top to bottom for enhanced stability compared to traditional deadbolt assemblies. Features premium stainless steel construction that resists corrosion.

Lever-Style MPLS

Lever-style handlesets bring form and function together with decorative styles. A convenient upward turn of the handle is required before all three points will engage. An integrated mishandling device helps protect the door and frame from accidental damage. Features deadbolt below the handleset.

(Highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors. Strike plate packages available to meet the installation needs of various MPLS applications.)

Tongue

Shootbolt

(For door systems with an astragal.)

Exterior Handlesets

Millennium

Finish Options

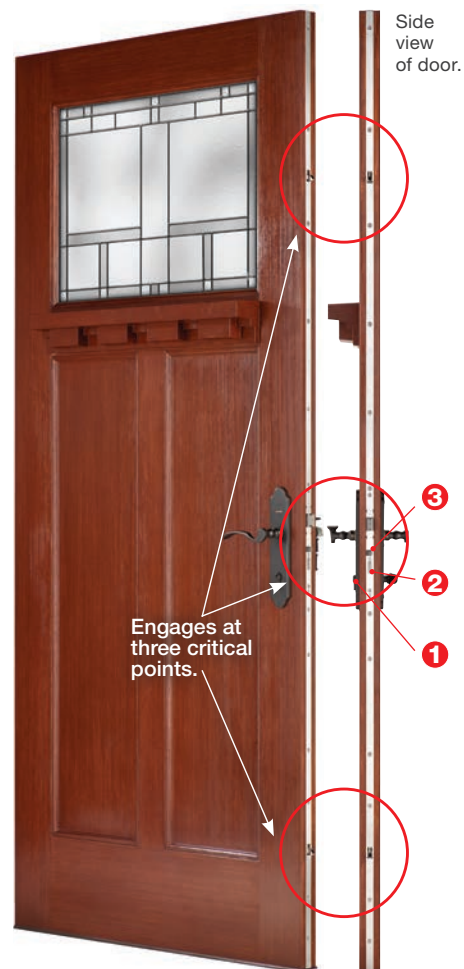

Brushed Nickel

Black Nickel

Oil-Rubbed Bronze

Polished Chrome

Side view of door.

Exterior view of door.

- 1 Self-lubricating locks.
- 2 1" premium stainless steel deadbolt.
- 3 Integrated mishandling device.

Design and functionality.

New composite door frame featuring Tru-Guard™ composite technology provides a rot-free solution engineered to work together with rot-resistant Therma-Tru doors and components.
