²Comparison of fiberglass to wood doors (both without glass).

Door Construction

Fiber-Classic and Smooth-Star doors set the standard for beauty, quality and performance at an excellent value. Explore the craftsmanship and innovation of doors designed for long-lasting energy efficiency, durability and security.

1 WEATHER RESISTANCE

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

2 SECURITY

Our fiberglass door slabs are up to 30% more resistant to kick-ins than standard steel doors.¹ Our Fiber-Classic and Smooth-Star doors feature an enhanced lock block combined with a 1-1/4" engineered lumber lock stile which increases rigidity and stability.

3 DURABILITY

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

4 R-VALUES

Built with a polyurethane foam core that offers up to four times the insulating R-Value of wood², Therma-Tru® fiberglass doors insulate against cold and heat for exceptional energy efficiency.

NEW Select full-lite configurations are now available with triple-pane Low-E clear and privacy glass options to meet ENERGY STAR® requirements in all 50 states.

FIBER-CLASSIC® MAHOGANY / OAK

Fiber-Classic Mahogany complements rich wood tones in home exteriors, extending the look to the outside with beauty and elegance. Fiber-Classic Oak features the warm look and feel of natural Oak graining.
